Message from the Guest Editors

Drastic deforestation, poor forest management and forest hygiene, alongside the climate change threat are considered as major threats to the stability of forest resources. Biotic factors, like insect pests and microorganisms, and abiotic factors, like wildfires, are considered as major threats worldwide. With forest exploitation and continuous forest decline, sustainable practices that preserve the balance between human needs and the environment are needed to ensure forest viability.

Adaptive management practices, under the frame of multi-purpose silviculture, alongside policies that aim to protect the natural environment and biodiversity, are crucial to maintaining the effective use of forest resources.

Keywords:

- Forest protection
- Wildfires
- Forest management
- Forest pests and diseases
- Global change

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, AGRICOLA, AGRIS, PaperChem, and many other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
